GRAND | HYATT

“THANK YOU!
WE LOVE OUR
FIREPLACES!”

- Grand Hyatt Hotel

A DRAMATIC
STATEMENT PIECE FOR
THE NEWEST GRAND
HYATT REGENCY HOTEL
IN DENVER, CO

These striking, stacked fireplaces were designed to be over-the-top to impress guests from all over the world. Located in the lounge, this is often the first thing patrons see and is a common backdrop for social media photos.

Views of the flames can be seen from every angle due to tall flames combined with reflective porcelain panels installed on the top, bottom, and sides of the interior of the fireplace.

(4) Blaze6 See-Through
Kansas City Star Casino | Mulvane, KS

KANSAS CITY STAR CASINO

Commercial Builder on the Kansas City Star Casino project, John Gratz, came to us curious about the Blaze's flame height and average glass temperature.

When we told him the overall flame height, 9" - 12", and glass temperatures that don't exceed 110°, he said firmly that "he'd been told that before."

Gratz had originally gone with a competitor to craft 3 linear, see-through fireplaces that were placed between the casino floor and the Woodfire Grille restaurant and a 4th in a private dining room. The product produced by our competitors delivered flames so small they couldn't be seen from either the casino or the restaurant. The fireplaces also created so much heat, even being raised above head height, they were making guests uncomfortable.

Gratz came from Kansas to Minnesota to see for himself that our fireplaces would go above and beyond his expectations. The Blaze fireplace series was able deliver the flame and cooling temperatures his project needed. In an effort to have the section of the casino and restaurant shut down for as little time as possible, our Field Technicians directed Gratz's install team and the project was completed in 1 day. Gratz was so satisfied with the final fireplaces that he made Acucraft his go-to fireplace supplier.

The image shows a spacious, modern lounge area. A large, single-sided fireplace with a black frame and glass media is the central feature. The room is filled with contemporary furniture, including white and red armchairs and sofas. Large windows on the left side offer a view of the outdoors. The walls are finished with light-colored wood paneling.

THE PERFECT DESIGN ELEMENT FOR THE NEWEST ADDITION AT SACRED HEART UNIVERSITY

The tallest flames on the market combined with a standard, matte black frame and black glass media create the desired relaxing and invigorating atmosphere for this college lounge.

Students congregate near this fire feature to study and socialize. This fireplace has become the highlight of the addition and is a definite draw for potential students.

ON-SITE SERVICES

In addition to offering lifetime customer and service support to our customers, we also offer On-Site Services for residential and commercial customers. Your Fireplace Advisor will assist you with arrangements and additional information.

PRE-INSTALLATION

An Acucraft Field Technician will meet with your installation team on-site to go through every step of the installation. NOTE: Recommended to have the fireplace and all of the components on-site but not yet installed.

CALIBRATION

Upon completed installation of the fireplace, an Acucraft Field Technician will verify the installation and make any adjustments to your fireplace and components for optimized performance. This includes training on operation and maintenance to the primary fireplace operator.

MAINTENANCE, REPAIR, & TROUBLESHOOTING

Although rare, if an issue does arise, Acucraft is prepared to assist. Whether you need a troubleshooting phone call or a Field Technician to go to your location, options are available for you. Where you are, we are. That's why our motto is "Together Forever."

Cabela's

CABELA'S

"The components used in Acucraft fireplaces are robust and the best quality you can buy. The boxes themselves are well welded, well designed, and HEAVY duty."

T.G.I. FRIDAY'S

"We are impressed and satisfied with the care and attention given by Acucraft. They answered questions quickly and provided us with additional requested information."
