

# CUSTOM GAS FIREPLACES

Buy Direct. Be Unique.

# WHY ACUCRAFT

- At Acucraft we know you want a fireplace that stands out
- In order to do that you need a unique fireplace. The problem is all other fireplace manufacturers make the same product, which makes you feel stuck and frustrated.
- Stop being frustrated with limited, boring, mass-produced products, and instead work with the world's leading direct sell fireplace manufacturer and have a unique fireplace that you will love forever.

# 4-Sided Glass Fireplace

Private Residence | Cape May Point, NJ

After unsuccessfully finding a fireplace manufacturer that could bring his dream fireplace to life, Continuum Dynamics, Inc. President & Owner, Dr. Alan Bilanin, found Acucraft. He subsequently was inspired by our modern 4-sided gas fireplaces on Houzz (below), and was excited to work with the leading custom fireplace manufacturer!

Alan's architect, Graydon Yearick, drew up plans for the fireplace and an Acucraft fireplace designer worked one on one with Alan and Graydon to ensure design integrity, safety, & functionality.

Alan was so pleased with his fireplace that it became a main focus of his design architect's photo shoot of the property!

Custom Gas Circular Fireplace | AVA NoMA Apartments | Washington, D.C.

Custom Gas 4-Sided Glass Fireplace | West Square Apartments | Boston, MA

Custom Gas Panoramic Open Fireplace | Private Residence | Whitefish, MT

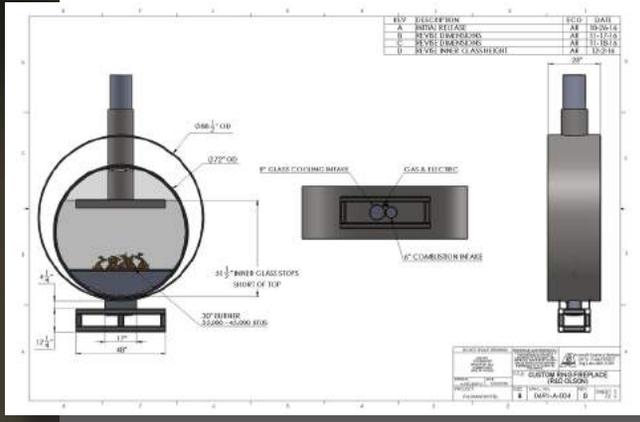

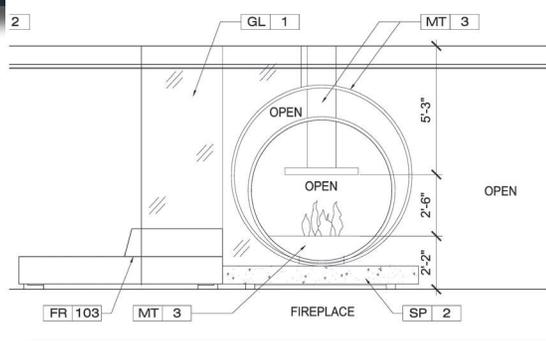

# Concentric Circular

Palomar Hotel | Beverly Hills, CA

Mark Melzer (Melzer, Deckert & Ruder Architects, Inc.) and Craig Hardman (Dawson Design Associates, Inc.) were looking for a one of a kind fireplace they had designed for the lobby of the Palomar Hotel in Beverly Hills, CA.

Unable to find a manufacturer who could fulfill their design intent, they began searching for a custom fireplace manufacturer who could complete the project within a short time frame. Thankfully they found Acucraft, the leading direct sell custom fireplace manufacturer!

One of Acucraft's fireplace advisors worked closely with Mark & Craig including reviewing their own renderings & drawings to ensure all the details were covered.

Acucraft's design team worked with the project engineer, Mat Epperson (RD Olson Construction), to finalize the design dimensions, requirements, and installation overview. This truly unique fireplace became the ultimate focal point of the hotel's lobby and the perfect place to host an Emmy after party!

Custom Gas Indoor/Outdoor Linear Fireplace | Blue Mountain Ski Resort | Palmerton, PA

Custom Gas Oval Open Fireplace | Elliot Park Hotel | Minneapolis, MN

# GLASS OPTIONS

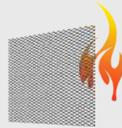

## No Glass (Open)

Open hearth viewing area

## No Glass (Firescreen)

Open hearth viewing area with protective firescreen

## Single Pane

Average glass temperature of 255°F

Radiant heat, warm touch

## Dual Pane

Glass temperature as low as 100°F

Patent-Pending Glass

Cooling System

## Conversion Kit

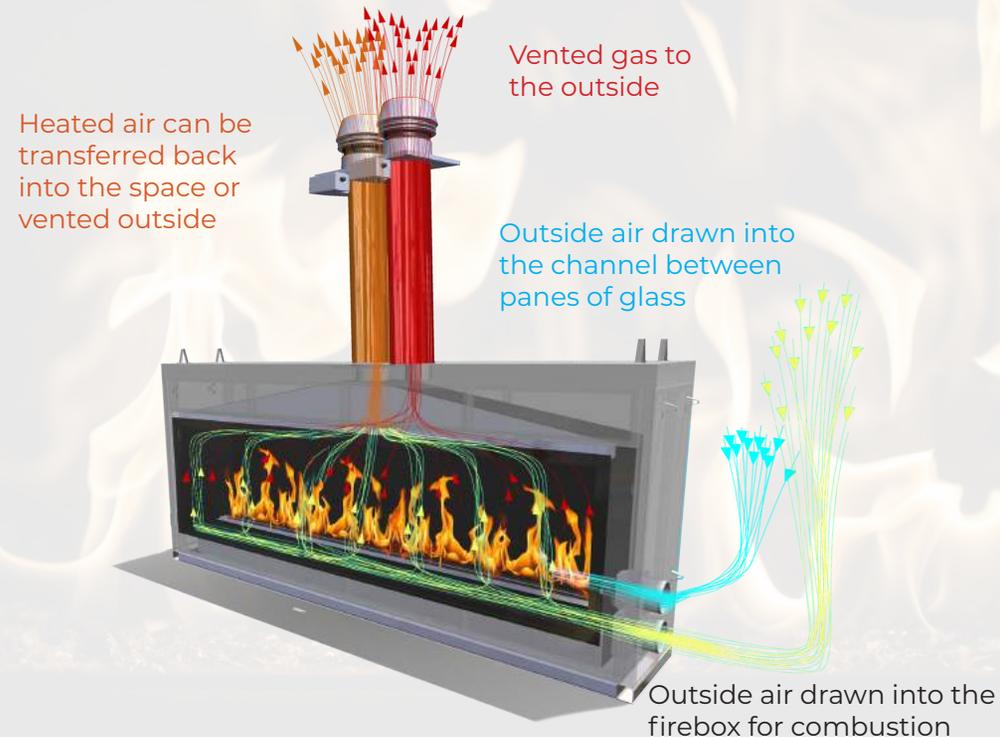

Convert your fireplace from dual pane glass to open with firescreen with our 10 minute conversion kit!

## Glass Cooling System

Glass temperature as low as 100°F

Our Patent-Pending Glass Cooling System forces outside air into the air channel between the panes of glass reducing the surface temperature of the glass to a safe-to-touch temperature.

Custom Gas Tall Linear Outdoor Fireplace | Private Residence | Ross, CA

# SAFETY + TESTING

We know how important safety is to you, which is why we built our own internal test lab where every gas fireplace is tested for safety + functionality to US and Canadian standards (ANSI Z21.50 / CSA 2.22). Acucraft is the only custom fireplace manufacturer in the world with the ability to third party test + label every custom gas fireplace for our customers.

Our custom gas fireplace systems are designed with multiple safety checkpoints, each of which needs to be met before the system will ignite:

- **Step 1:** when the fireplace is turned on it sends a signal to the automatic draft system which opens the damper
- **Step 2:** the exhaust fan engages
- **Step 3:** the proven draft ensures positive exhaust of flue gases
- **Step 4:** the gas valve opens signaling the spark ignitor and the flame sensor provides combustion

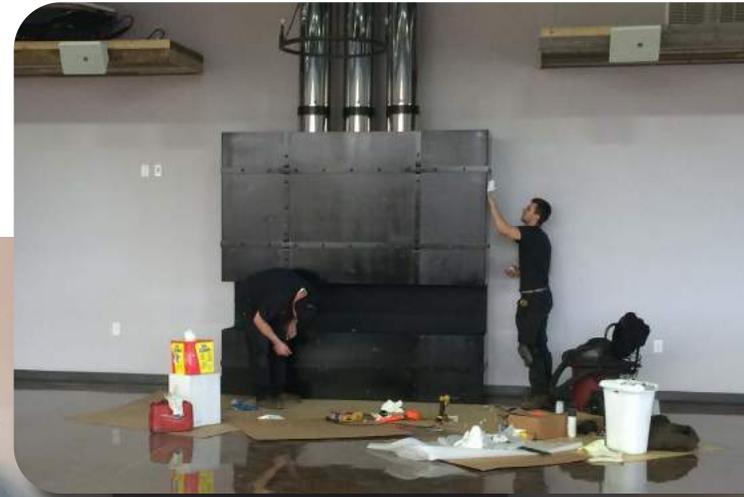

Custom Gas 4-Sided Fireplace with Glass Reveal | Private Residence | Tiburon, CA

# WORLDWIDE ON-SITE SERVICES

Every Acucraft custom gas fireplace includes an on-site with one of our Factory Representatives to walk you through your first fire in-person. They'll calibrate your fireplace, review fireplace operation with you, and answer any questions you have. Acucraft also offers on-site services for maintenance, repair & troubleshooting.
