# A Circular Story

Google Inspiration Drawings  
By RNL Design

Acucraft Renderings

Acucraft Fireplace Test Performed by  
Robin Shepherd (A E), Fireplace Designer

One of our recent circular fireplace projects was for the Pearl Palace, Google's latest headquarters. The new location is in beautiful Boulder, CO. This project was spearheaded by RNL Design and put into place by Swinerton Builders. RNL came to us because they wanted Google's new fireplace to mirror Google's unique and innovative personality.

After viewing Google's Inspiration Drawings, we knew our Circular Fireplace was just what they were looking for. We worked closely with RNL and Swinerton Builders to ensure correct specifications, styles and safety.

Our Circular Fireplaces are different than anything seen before. The design evokes curiosity. The flames bring up feelings of intensity and passion. This combination makes our Circular Fireplaces ideal for office lobbies, distinguishing hotels, and luxury residential homes. These certified fireplaces come with a 48" x 47" unobstructed viewing area. Enjoy this fireplace from any angle; because it has no angles!

We don't carry stock fireplaces; we create each fireplace specifically for you, your clients, and your space. We work closely with discerning clients who want unique fireplaces. Acucraft will ship your fireplace directly to your site, worldwide.

Private Residence, Chicago, IL

# Glass Cooling

Acucraft's patent-pending Glass Cooling System forces air into the air channel between two panes of glass. This ensures touchable glass temperature by keeping the outer glass cool. Glass Cooling Air is then released outside. Average glass temperature is 145° F.

We strive for the best flame possible for all our fireplaces; with two separate airflow systems to ensure a tall, lazy flame with less turbulence.

# Intake & Exhaust

## Intake

Combustion Air and Glass Cooling Intakes are located at the bottom sides of the fireplace. Air is taken from the room, allowing easier installation.

## Exhaust

Inner flue containing exhaust and outer flue containing heat relief. After meeting at the Plenum Box the flues are separated, allowing for more finishing options.

\*Other Intake and Exhaust Options Available. Ask Your Fireplace Advisor for More Information.

## Acucraft: Custom Built For You

Since 1979 we have survived and thrived due to our passion and ability to provide unique fire solutions for our customers. Your design is the primary focus of our Fireplace Advisors and Designers.

Through Passion, Innovation, Honesty, Excellence, and Hard Work we provide You with a unique, amazing product and exceptional customer service.

Let us bring Your design to life!

"Thank you for The Hermitage Club fireplace. Definitely one for the record books and a worthy accomplishment on many fronts. We're very proud! Thank you for contributing the highlight!"

- Austin Design Inc.

"We love the custom fireplace that you helped us design into the Marriott Indianapolis East's new lobby!"

- Shawn Curran, Curran Architecture

"Thank you! We love our fireplace!"

- @GrdHyattDenver
